## Article Guidance

### Article Text:

The Medicare ambulance benefit is for transportation of a beneficiary. Payment for ambulance services is only made to the provider/supplier that provides the transport regardless of how many providers/suppliers respond to a request for an ambulance.

In order for claims to be processed and paid in a timely manner it is important that claims submitted for ambulance services contain all of the required information. The information in this Article is intended to assist ambulance provider/suppliers in the proper submission of claims to ensure timely and accurate processing.

Please note that the ICD-10-CM codes provided in this Article **do not** represent an all-inclusive list of acceptable diagnoses. Due to the large number of diagnosis codes available, the codes are being provided only as a list of **suggested** diagnoses codes in an effort to assist providers/suppliers.

Providers/suppliers may choose a diagnosis code from the provided list in the coding section of this Article to report as the primary diagnosis code **or** they may choose a diagnosis code from the ICD-10-CM manual that accurately depicts the patient's condition at the time of transport.

In addition to the primary diagnosis code, a secondary diagnosis code will be **required** on all claims reporting ambulance services. Please refer to the Local Coverage Determination, L35162, Ambulance Services (Ground Ambulance) for the list of secondary diagnoses that are considered Reasonable and Necessary.

While reporting of applicable diagnoses codes is an important part of submitting claims for ambulance services, there are other key items that need to be reported correctly in order for proper processing. The following are a few reminders of key elements that are required on all ambulance claims. (Please refer to the CMS Internet Only Manual, 100-04, Chapter 15 for complete billing requirements)

- Date of Service: The date of service reported on the claim should be the date that the ambulance departs the point of pickup with the patient on board.
- ZIP Code of the point of pick up: The Zip code for the location where the patient is at the time that they are placed on board the ambulance must be reported on all claims. Electronic billers must report the ZIP code for the point of origin and destination. All Zip codes should be reported with 5 numbers.
- Service Units: For each ambulance trip represented by HCPCS codes A0426, A0427, A0428, A0429, A0433 and A0434 the units of service should be one. The units of service for HCPCS code A0425 should represent the number of loaded miles.

## Coding Information

[ FUTURE ]

### Bill Type Codes:

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the article does not apply to that Bill Type. Complete absence of

all Bill Types indicates that coverage is not influenced by Bill Type and the article should be assumed to apply equally to all claims.

N/A

### Revenue Codes:

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory; unless specified in the article services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the article should be assumed to apply equally to all Revenue Codes.
